

THERMOFLEX

Characteristics	
Thermal class (temperature index)	B (120 °C)
Chemical composition	
Base resins	Modified Polyvinil Acetate
Overcoat	-
Bonding coat	-
Reference to the International Standards	IEC 60317-12
UL – approval	-
Significant properties	<ul style="list-style-type: none">• High mechanical and solvents resistance. Due to excellent resistance to oils it is advisable for transformers
